## BCX-2006 – The Two-Piece Craftsman Bench – with Saman Wood Top

Two black powder coated steel gabion bench bases with saman solid wood bench top

### Dimensions:

Craftsman Gabion Basket – (2) 18" L x 18" BW x 18" H

Saman Wood Top – 67" L x 25" W x 1.5" H

### Material:

The Two-Piece Craftsman Bench is constructed with 1/8" carbon steel and 0.135" steel mesh panels. The mesh panels feature 2" squares. The bases feature steel brackets that accept 3/8" anchors for solid surface mounting to prevent movement. The bases are assembled with included weather resistant hardware using Gabion Guys patented bolt together modular system. The bench top is a saman solid wood top with 2 live edges.

### Finish:

The carbon steel is electro-plated, and powder coated with a black, fade-resistant powder coating.

### Assembly:

The Two-Piece Craftsman Bench requires some assembly with the included weather resistant hardware. The bench top ships separately and will attach to the corresponding base brackets with the included hardware.
