BCX-2007 – The Inverted Craftsman Bench – with Saman Wood Top

60" black powder coated treated steel gabion bench with saman solid wood bench top

Dimensions:

Gabion Basket – 60" L x 18" BW x 18" H

Saman Wood Top – 67" L x 25" W x 1.5" H

Material:

The Inverted Craftsman Bench is constructed with 1/8" carbon steel and 0.135" steel mesh panels. The mesh panels feature 2" squares. The base basket features steel brackets that accept 3/8" anchors for solid surface mounting to prevent movement. The base is assembled with included weather resistant hardware using Gabion Guys patented bolt together modular system. The bench top is a saman solid wood top with 2 live edges.

Finish:

The carbon steel is electro-plated, and powder coated with a black, fade-resistant powder coating.

Assembly:

The Inverted Craftsman Bench requires simple assembly with the included weather resistant hardware. The bench top ships separately and will attach using the corresponding bench base brackets with the included hardware.
