UTB-4002 The Traditional Pillar Base

Gabion pillar base enhances with natural aesthetic appeal.

Dimensions:

The Traditional Pillar Base: UTB-4002 – 20”BW x 40” H x 20”TW

Material:

The Craftsman Pillar Base is constructed with 1/8” carbon steel angle and flat strap. The mesh panels are constructed of 0.135” carbon steel with 2” squares. It is assembled with included weather resistant hardware using Gabion Guys’ patented bolt together modular system.

Finish:

The carbon steel has a black powder coated treatment featuring weather resistant powder coating or it can be purchased with an untreated finish that will patina over time providing an authentic, rustic, weathered look.

Assembly:

The Gabion Modular Retaining Wall System requires simple assembly with the included weather resistant hardware.
