The Gabion Retaining Modules

Connected gabion baskets that form a free-standing wall or interconnect to create a retaining wall

Dimensions:

Retaining Module RET-1854 – 54" L x 18" W x 18" H

Retaining Module RET-1836 – 36" L x 18" W x 18" H

Retaining Module RET-1818 – 18" L x 18" W x 18" H

Retaining Bracket RET-1800 – 17.8" L x 1" W x 1.5" H

Retaining Spacer RET-1802

Material:

Each Retaining module is constructed with 1/8" carbon steel and 0.135" steel mesh panels. The mesh panels feature 2" squares. The retaining modules are assembled with included weather resistant hardware using Gabion Guys' patented bolt together modular system. The retaining brackets and retaining spacers connect each module together.

Finish:

The carbon steel has a traditional untreated finish that will patina over time providing an authentic, rustic, weathered look.

Assembly:

The Gabion Modular Retaining Wall System requires simple assembly with the included weather resistant hardware.
