BTS-1002 – The Gabion Bench Base

60" steel gabion basket base without bench top

Dimensions:

Gabion Basket – 60" L x 18" W x 18" H

Material:

The Gabion Bench basket is constructed with 1/8" thick carbon steel and 0.135 thick steel mesh panels. The mesh panels feature 2" squares. The base features steel tabs that accept 3/8" anchors for solid surface mounting to prevent movement. The gabion bench basket is assembled with included weather resistant hardware using Gabion Guys patented bolt together modular system.

Finishes:

Gabion finishes include a traditional untreated finish that will patina over time or an electro-plated and fade-resistant powder coating.

Benchtop Options:

The gabion basket base will support a variety of benchtop materials including wood, natural rock slabs, granite, marble, concrete, recycled plastic, and other synthetic materials.

Assembly:

The gabion bench base requires some simple assembly with the included weather resistant hardware. It includes corresponding brackets to connect and secure a benchtop as well as base brackets to anchor the bench to a solid surface.
